

# Plan de Reducción de Emisiones de la Comunidad Local de Lost Hills

## Reunión del Comité Directivo Comunitario

### *Lost Hills Local Community Emission Reduction Plan*

### *Community Steering Committee Meeting*

#### 10/15/24 Agenda:

- Bienvenida y Presentaciones (Saul/Jesus/Gustavo) 20 min
  - *Welcome and Introductions (Saul & Jesus & Gus) 20 min*
  - *We had 10 attendees*
  - *Yolanda, Humbertina Ana Maria Dias, Saul, Irma, Celia, Ana Rendondo, Daniel Esudienta universedad de Harvard, Jorge Mora,*
  - *Saul “ Greatful to have everyone excited to see what is next.”*
- Presentación sobre el Limite y las fuentes de contaminacion (CCAC Gustavo) 20 min
  - *Presentation Boundary and Pollution sources(CCAC Gustavo) 20 mins*
    - *The reason for the Boundary*
      - *Helps give us a focus.*
      - *Last time we spoke about selecting the area between Hwy 5 and the 33 .*
      - *We want to see inside the boundary the different pollution sources and I dentify the Governing agencies that over see them.*
      - *This leads to didverent prorams and incedntives like electric cars .*
      - *We can also get incentives for companies to reduce their pollution like low dust harvestors for the farmers.*
      - *We can get sidewalks as we know for a fact that reduces local eissionses and allows people to walk their community*
    - *Ultimate goal to develop measures that impact this area*

- *We have to*
  - *In Shafter*
    - *People were tired of the emissions. Outside of pesticide and oil*
    - *A company turned ion several tractors to low harvest and now there is a huge visual and*
    - *Yes, it went to a company but they were polluting a lot and now not as much*
    - *We also are going to place several trees to protect from emissions near the schools. To protect the schools. If you can't stop them completely how can we protect ourselves*
  - *We can develop plans to address the different concerns*
- *Siguiimiento al Desarrollo de Estatutos, y perfilio de la comunidad (Gus) 45-60 mins*
  - *Finalize of charter development and Community Profile (Gus)45-60 mins*
  - *Mora: La GP y la Holloway is dangerous because several trucks just spill their trash in the area and don't clean it up. There are times you can't even see the road under all that they spill. The company I work for we make sure our trucks don't leave dirty so they don't dirty the Holloway. The truckers are mad and mention that the other company down the road just lets them leave as they are.*
  - *We have 2-3 people make sure the trucks leave clean.*
  - *Ana R: La GP y la Holloway there is a horrible odor when we go to work in that area. We think its due to the sludge that comes from LA. It also has a strong odor of oil and gas production so I think its contaminated dirk from the oilfields being dumbred there as well. We have been seeing more and more truck come through the community*
  - *Saul: I've seen those trucks in the morning filled to the brim with contaminants they stop in front of my house on the way to Holloway. I can't breathe and feel like I'm choking when they stop*
  - *Jesus: it maybe the landfill that recently had an expansion approved to allow for more toxic waste*

- *Ana MD: I don't understand how they are allowed to just pile more and more pollution on us.*
- *Everyone: HM Holloway Inc is the one that allows trucks to overspill on to the road.*
- *Gustavo we are asking the state to provide us with a list of companies in our boundaries. data would be NOx, pm2.5 emissions etc. we would have that data available to us. GIS Map.*
  - *This is the Shafter map*
  - *7 mile circle around Shafter*
  - *We are able to see the different contaminants. We can see each square how many tons of contaminants are present.*
  - *This is how we can build our profile.*
  - *We can see stationary sources, and how much they are producing.*
  - *We can see their proximity to sensitive receptors like people and animals*
  - *If we don't do it this way we will submit a PRR for all this data*
- *Ana Redondo: They are currently spreading some oil substance on the almonds to get them to ripen faster. I would like to know what they are spraying and how that impacts up.*
- Cronograma, próximos pasos, reuniones futuras (Jesus) 20 mins
  - Timeline, Next Steps, future meetings (Jesus) 20 mins
  - Next steps
    - Gus and Jesus will develop a letter to be approved by the LCERP.
    - We need volunteers to house the SNAPS monitor
    - Volunteers: Jorge Mora, Saul Ruiz, Eneida, Celia Acosta
  - Next Meeting 11/19/24
  - December Meeting move to 12/10/24
